## OBJETIVOS

36 years old, focused on conciseness, user accessibility, and interoperability. Seeking opportunities to broaden knowledge and embrace new challenges while upholding clean code and strong standards.

## LANGUAGESS

English ★★★★★

Spanish ★★★

## EXPERIENCE

### ● Senior Software Engineer – Java/Python Programmer

Kyndryl – Hortolandia – SP (Home Office)

September 2021 – present

Kyndryl is an IBM spinoff, and I'm continuing with the same team. At Kyndryl, we're building a service extension platform that follows the previous model while giving clients control over solution deployment. We use Docker and Kubernetes to manage client images.

### ● Senior Software Engineer – Java/Python Programmer

IBM – Hortolandia – SP (Home Office)

May 2016 – August 2021

Developed an integration framework for ticketing and event systems (ServiceNow, Netcool, Remedy) using the publisher/subscriber design pattern. Focused on enabling data sharing across systems regardless of source type (RESTful web services, SOAP web services, files/spreadsheets, etc.), tailored to client needs.

### ● Software Engineer – Java/Groovy Programmer

Catelani Sistemas e Telefonia IP do Brasil. – São José do Rio Preto – SP

June 2014 – April 2016

Developed a call center billing system using the Grails framework (Groovy), PostgreSQL, and Jasper for reporting. This solution integrates with a Java EE system and Asterisk for calls – both of which I contributed to. The frontend is a custom in-house single-page application.

### ● Software Engineer – Java Programmer

Pratic Sistemas Informática Tanabi Ltda. – Tanabi – SP

January 2011 – June 2014

Developed desktop applications using Java Swing, Firebird as the database, and JasperReports for reporting. Also built web systems that integrated with the desktop app with JSF and PrimeFaces, as well as small Android applications.

## SKILLS

- Proficient in Java – working consistently with Java 8 up to Java 17 and its EE platform with hands-on experience in web frameworks such as Spring MVC, Spring Boot, JSF, FrontMan, and Struts, both professionally and as a hobby. Solid understanding of ORM and JPA (including Hibernate), with experience in Maven and Gradle (the latter used alongside Groovy on large projects). Familiar with version control systems like Git/GitHub (and formerly SVN). Experienced in desktop development with Swing/AWT, native Android apps using SQLite and simple interfaces, as well as projects in augmented reality (course projects) and game development in Java. Additionally, I have proficiency in Linux systems administration/DevOps and am skilled in Groovy and Grails, with complementary experience in Ruby (Rails), Node.js (Express, MongoDB, Angular, React), and Python (Django, Flask).

## EDUCAÇÃO

### ● Pós-graduação (graduate) – Offensive Cyber Security

FIAP – SP Brasil

2025 – Present

### ● Bachelor's degree in Computer Science

Universidade Paulista – SP Brasil

2010 – 2014
